Summary

A senior MIS student with practical experience building and shipping web applications from scratch. I have worked across the full stack using a variety of web development technologies. I enjoy turning user problems into clean, functional products that solve real pain points. Looking for a development role where I can contribute my skills to the team. Available full-time immediately.

Projects

BongMala

2026

QR ordering system for a malatang restaurant. Customers scan a table code, pick their bowl, place an order, and track it live. Built in a team of 4.

- Led the full-stack build with Laravel, React, TypeScript, Vite, and MySQL. Handled public ordering, fixed sets, DIY bowl options, and real-time order status.
- Wrote Sanctum-protected admin pages for menu items, categories, tables, orders, payment confirmation, and printable table QR codes.
- Added English/Khmer language toggle, USD/KHR price display, image uploads, test data seeding, automated tests, and production build checks. Demo video in the repo.

UniAssignment

2026

Academic workspace where students track assignments, manage subjects, and keep up with deadlines.

- Built with React and TypeScript. Includes calendar view, board view, a notes editor, Pomodoro timer, and offline PWA support.
- Hooked up Firebase auth and Firestore, added Telegram reminders and an AI study chat, then shipped it to Vercel with dark and light themes.

Inventory-Management

2025

Stock management system for small businesses with bilingual UI and role-based access.

- Built the Laravel and React app from scratch. Set up role-based access and managed the entire development process.
- Covered CRUD for products, image uploads, supplier records, and live stock counts so the client could run daily operations from a browser.

Education

Bachelor **SETEC Institute**, Management Information Systems (Year 4)

Phnom Penh, Cambodia

- Expected graduation: 2027

Jan 2023 – present

Volunteer

Celebrating Cambodia (សាទរកម្ពុជា)

2024 – 2025

- Took part in the national New Year countdown parade with around 3,000 performers in front of the Royal Palace and along Sisowath Quay, Phnom Penh.
- Worked with the group on choreography, timing, and logistics to pull off a live Khmer cultural performance for tens of thousands of people on-site.
