Summary

A senior MIS student with practical experience building and shipping web applications from scratch. I have worked across the full stack using a variety of web development technologies. I enjoy turning user problems into clean, functional products that solve real pain points. Looking for an opportunity where I can contribute my technical and analytical skills to the team.

Experience

Freelance, Web Developer

2026

Built and deployed a custom Content Management System (CMS) for a commercial client.

- Developed the application in Laravel, matching the client's UI/UX designs.
- Set up the database and admin dashboards so the client can update their own site content without needing a developer.

Projects

BongMala

2026

QR ordering system for a malatang restaurant. Customers scan a table code, pick their bowl, place an order and track it live. Built in a team of 4.

- Led the full-stack build with Laravel, React, TypeScript, Vite and MySQL. Handled public ordering, fixed sets, DIY bowl options and real-time order status.
- Built Sanctum-authenticated admin portal for menu items, tables, orders, payments and printable QR codes.
- Added English/Khmer toggle, USD/KHR pricing, image uploads, database seeders, automated tests and production build checks.

UniAssignment

2026

Academic workspace where students track assignments, manage subjects and keep up with deadlines.

- Built with React and TypeScript. Includes calendar view, board view, a notes editor, Pomodoro timer and offline PWA support.
- Hooked up Firebase auth and Firestore, added Telegram reminders and an AI study chat, then shipped it to Vercel with dark and light themes.

Inventory Management System

2026

Web app for managing stock, purchases and sales with role-based permissions and live inventory tracking.

- Built full-stack system with Python (Flask), React (TypeScript), SQLAlchemy and TanStack Query.
- Set up Admin, Manager and Staff roles with stock locking in MySQL and automated Pytest test suites.

Education

Bachelor

SETEC Institute, Management Information Systems (Year 4)

Phnom Penh, Cambodia

- Expected graduation: 2027

Jan 2023 – present

Volunteer

Celebrating Cambodia (សាទរកម្ពុជា)

2024 – 2025

- Performed in the national New Year countdown parade alongside 3,000 others at the Royal Palace and Sisowath Quay.
- Coordinated team logistics and staging for a massive live cultural performance.

Skills
